

Quick Installation Guide

150Mbps Wireless N USB Adapter

MODEL NO. TL-WN727N

Package Contents

TL-WN727N

QIG

USB Cable

Resource CD

System Requirement

- Windows 8
- Windows 7
- Windows XP

1 Hardware Connection

Method One

Method Two

You may see the **Found New Hardware Wizard**, when the adapter is plugged. Please click **Cancel**.

2 Software Installation

(The installation procedures in Windows 8/ 7/ XP are similar. Here we use the procedures in Windows 7 as an example.)

- 1** Insert the TP-LINK resource CD into the CD-ROM drive.

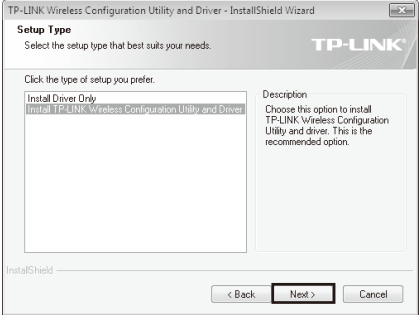

- 2** Find the model TL-WN727N and select **Install Driver&Utility**.

- 3** The **InstallShield Wizard** window will appear. Click **Next** to continue.

- 4** Select **Install TP-LINK Wireless Configuration Utility and Driver** and then click **Next**.

- 5** Click **Change** to specify the destination location or you can leave it default. Click **Next** to continue.

- 6** Click **Install** to install the driver and utility for your adapter.

- 7** The installation of the driver and utility may take 1~2 minutes.

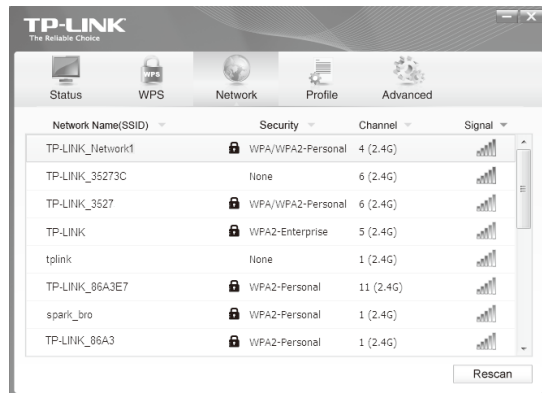

- 8** The following screen will then appear. Click **Finish** to complete the setup.

3 Connect to Network

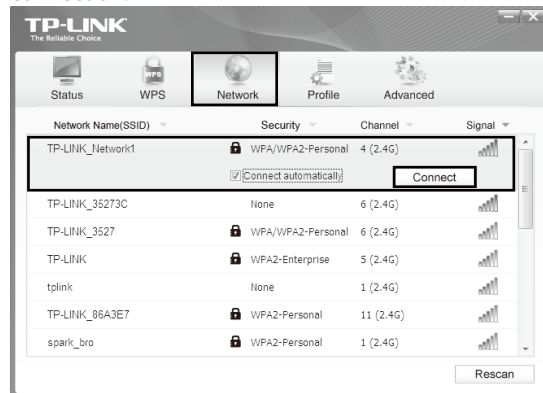

(You can skip to **Appendix: Connect to Wireless Router by WPS** to quickly connect to a network if your Router or Access Point features WPS/QSS function.)

- 1 After installation, the configuration page will pop up on your desktop.

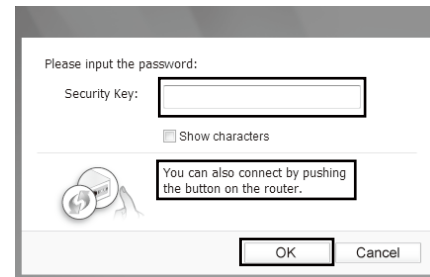

Note The icon  will appear on your desktop. Double-clicking on the icon can start the utility.

- 2 Click **Network** in the tools section to display a list of available wireless networks. Highlight the target network name (e.g. TP-LINK_Network1) and then click **Connect** to build a connection.

Note Here we only choose a wireless network with the security type of **WPA/WPA2-Personal** as an example to elaborate the following steps. If you want to know more about the connection to a wireless network with the security type of **WPA/WPA2-Enterprise**, please refer to the User Guide on the resource CD included.

- 3 If the network is unsecured, you will directly connect to it. If it is security-enabled, you can input the security key into the field beside **Security Key** and then click **OK** to continue.

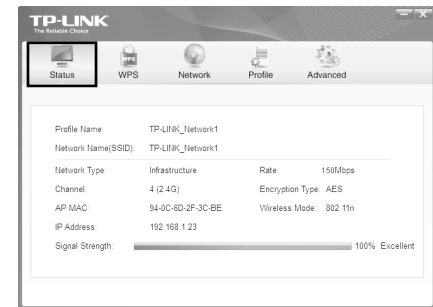

Note Without entering a key, you can press the WPS button on your router if the prompt **You can also connect by pushing the button on the router** appears.

- 4 The following screen indicates successful connectivity. Click **Close** to enjoy the Internet.

- 5 To view more information about the network connected, click **Status** in the tools section.

Appendix: Connect to Wireless Router by WPS

If your wireless Router features the WPS/QSS function, you can also set up a wireless connection in this way.

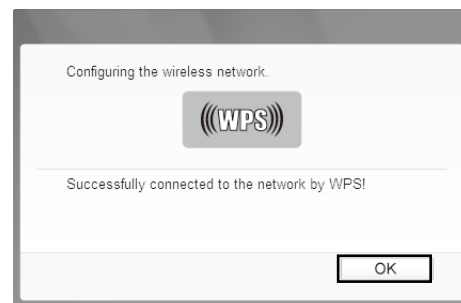

- 1 Push the **WPS/RESET** button on the back panel of the Router. Here we take Router TL-WR841ND for example.

- 2 With the adapter plugged into the USB port on your computer, push the **WPS** button on the adapter.

- 3 Wait a while for the connection progress to be completed. The following screen indicates that the connection has been successfully built. Click **OK** to finish the WPS connection.

Note For detailed instructions of WPS, please refer to the User Guide on the resource CD.
